# PTS200

The PTS 200 offers value-for-money performance and is ideal for internal wiring installations. The PTS200 is available with either the UK specification plug Model 432A or the RJ11 International Plug

The PTS200 Tone Generator gives optimum performance when teamed with the PTS100 probe (page 24) and offers excellent value for money pair tracing capability.

- *Output levels 3.0dBm ± 3dBm, frequency 1004Hz ± 100Hz sweep tone.*
- *Sweep rate + 6Hz nom. Polarity/voltage test to > 1500 at 50V.*
- *Resistance test to > 1000.*
- *Battery life 290 hours typ. IEC 6LR61.*
- *Dims: 125mm x 23mm.*

| Description | Cat./UPC No. |

| PTS200 with RJ11 Plug (International) | M0111/00 |
| PTS200 with 432A Plug (UK) | M0111/01 |

# 77 Series Tone Generators

The 77 series Tone Generators have become an industry standard component in the tool kits of technicians in all of the premise and outside plant wiring industries. By applying a tone signal to a wire pair or single conductor, and using an inductive amplifier (probe), the tone generator permits technicians to identify the conductor within a bundle, at a cross-connect point or at the remote end. These tone generators can be used on twisted pair wiring (telecom, datacom, etc.), single conductors, coaxial cables, de-energized AC wiring and most other wiring.

- *Each unit provides four basic functions of tone signal, continuity testing, talk battery supply and line polarity confirmation.*
- *77HP, 77HP/6A and 77HP/6AC test polarity on Lines 1 and 2 through the modular plug.*
- *77HP/6AC has a cloth lead cover for added strength and durability.*
- *1-year warranty.*
- *Battery-operated (9V not included).*

*77HP*

*77HP/6A*

*77HP/6AC*
